WEDNESDAY, SEPTEMBER 6. Our Honolulu Letter.

(From the S. F. Insurance Hesiew).

Editor Coast Review :- Dear Sin,-From

By half-past six the stores are all closed, and the stress in the business portion of the city almost discreted. This does near with the eserted. This does away with the gas or coal brick or coral. oil huzard.

The Second and quite as important a cause is. that, influenced either by their own good judgment or by the restrictions placed upon them by beir home offices, the agents have heretofure persistently refused to write upon either stocks or buildings in the long rickety frame ranges.

Aurones of the article published in our last est possible motive (that of self preservation) for

for actual cooking purposes, and this lack of constant use of stoves or fire places has a material agency in reducing the fire hazard, for the dwellings are all lightly constructed, generally without laths and plaster, and under the constant and ardent rays of a tropical sun, are reduced to a combustible condition little short of actual

three times every night, certainly does not tend to reduce the fire risk upon their frequently straw thatched and carpeted and occasionally Lloyd's List reports the arrival of the Savan-

not a fire occurred during the month which I gated by Stephen Rogers, of New London, Conhave spent here—a striking contrast to San Francisco, where our fire bell is much more librate to wast out that the strike is much more librate to wast out that the strike is the strike in the strike in the strike is the strike in the strike is the strike in the strike in the strike in the strike in the strike is the strike in the s likely to wear out than rust out.

Davies; Hamburg-Bremen (fire), whose interests are carefully protected by F. A. Schaefer; North British and Mercantile (fire), conducted by Mesers. Hoffschlaeger & Co.; Swiss Lloyd (marine), in the hands of Messrs, W. G. Irwin and California (marine), all represented by Messra H. Hackfeld & Oo.; the Union (marine) of which Messra. Castie & Cooke are agents; the Fireman's Fund (fire and marine), whose interests are guarded by Messra. Bishop & Co.; and the New Zealand (fire and marine), now, unfortunately, without an agent, but, until two days since, represented by the late George N. Owen, Esq., whose body will this day be conducted to the grave by his mourning friends. and whose patience under months of acute suf-lering, and uniform courtesy to all whom he

met, has earned for him the sympathy and regard of the entire community.

To these companies may be added the London and Liverpool and Globe (fire), which has just tendered its agency to Messrs. Bishop & Us., and you have a total of eight fire and seven marine companies, more than appearing the companies, more than appearing the companies. marine companies, more than enough for present requirements, as the business to be desired by careful underwriters is so limited in quantity, thut, when divided among the various agencies, it affords but a small share for each, and, of course, creates considerable competition and a consequent reduction of rates upon first-class business to a figure considerably below that

Manufactured by the Pacific Rubber Paint Co. of San Francisco. charged for similar hazards at San Francisco. tion at this place, but the various agents, apprecisting the advantages frequently to be derived from united action, held a meeting about two weeks sluce, to discuss the propriety of organiz-ing a local board, and I trust that before long the fixed fact. It is not proposed at present to adopt a tariff of rates—at least no more than a partial one--but they can with advantage combine at once to obtain increased reservoir capacity, to petition for the furnishing of a steam fire engine, being a great advantage as it can be used by any one.

legislature, providing for a tax upon the insurance The Esplanade or water front is broad, wellbuilt and kept in excellent repair and affords loading and discharging facilities much beyond the present requirements of the city. The best buildings are nearly all the property of the government, erected or commenced during the reign of Kamehameha IV. Prominent among them are the Government Building, Custom House, Hotel, Post Office and Government Warehouse. These are all substantially built of concrete, the Custom House and Warehouse being provided with iron doors and shutters. The latter is divided into two compartments by a solid wall reaching to, but not extending above the roof, an aversight, in correcting which it would be economy for the government to expend a few

hundred dollars. In viewing the public property one cannot but observe the substantial manner in which the work

plete the sotire work. The patent asphaltum (known in S. F. as com-position) roofing has been quite extensively used here, but recently, in almost every case, it has been either replaced by or covered with slate, it having been found that exposure to the continuous heat of the sun here melts the asphaltum and causes it to run down to the eaves, reversing the object for which it was intended by effectually stopping the gutters and exposing the roof.

HAWAIIAN GAZETTE this section is not great, especially in the two

carries its own description), and the Sailors' Home, a large, rambling three story edifice sur-tounded by verandahs and abounding in halts and stairways, nooks and corners, where the fire fiend

So long as they are without insurance in this Editor Coast Review: -Dean Sin,-From an underwriter's point of view, this is a city of apposites, and, during my month's sejourn here, I have been endeavoring to reconcile the theory that frame ranges of the most approved tinderbox pattern will burn, with the fact that, for many years past there has been but one fire of companies, and offer-many years past there has been but one fire of the possibility of some "enterprising? agent of a class with which we have all had more or less experience, descending upon this quarter fully equipped with powers extraordinary from a measurable in the frame district, and that any magnitude in the frame district, and that sugerie of feline incurrance companies, and offering poor Hawaii a thousand-dollar policy in eithe My observations have resulted in the discovery of several reasons for the city's past immunity dollar stock, it makes me shudder to think with from fires, and also some tendencies which, if not checked, will probably result in greater fire loss in the not far distant fature.

Should a fire once obtain headway here, it

Should a fire once obtain headway here, it Three prominent causes for the unusually would sweep down upon the business section on small number of fires heretofore are:

First-No business is transacted after dark.

The merchants generally leave their offices at would resist its consuming breath. But this is from 3 to 4 P. M., either to dine or for a drive to not a pleasant prospect for underwriters : let us Wakiki, where, after a cip into old Neptane's dominions and a few moments' firitation with the fishes, one emerges refreshed and vigorous.

Americans have the Monor.

Apropos of the article published in our last week's issue, in regard to the first steamer that crossed the Atlantic, the following letter written to the London Times in 1851, by Pay-director John S. Cunningham, now in charge of the Na-val pay station here, will be found conclusive on the subject. The honor is clearly due to the

To the Editor of the Times-Sir: In your journal of the 22d inst., the following statement occurs in an article descriptive of machinery in the great exhibition: "About 1836-37 the project of crossing the Atlantic was started; the Si rius was, we believe, the first steam vessel which performed this feat."

On referring to the Times of June 21, 1819 you will find the following paragraph credited to Marwade's Commercial report for that week: "Among the arrivals yesterday at this port we were particularly gratified and astonished by the novel sight of a fine steamship, which came round at 735 F. M. without the assistance of a single sheet, in a style which displayed the power and advantage of the application of steam to ves-sels of the largest size, being 350 tons burden content fuel for a less man, requiring too much hopping and packing, they generally light but ne little fire per week, which they build in a sage she worked the engine 18 days. She is the hole in the ground, upon the coals of which sage she worked the engine 18 days. She is the they place their tare and cover it with earth until first ship on this construction that has undertak-

and entirely relieved from the lassitude which las been creeping over him during his day's confinement in the heat and dust of the city.

bordering Novanu Avenue—and they thus pro-vide to the residents of that section the strongendeavoring to avoid a conflagration.

Third—in this tropical climate, it is neither necessary nor comfortable to build a fire except

The deet of the native population consists of raw fish and pot-the latter, a preparation from the two root, and resembling in appearance and taste a dish of tall sticker's paste. When one aspires to furnishing an epicurean repast, he pro-vides in addition a few raw flying fish (considered an especial delicacy) and a dish of seaweed. They eat, drink, and sleep (all day) out of doors. They require a fire only to take their taro, and. as they have a variety of more satisfactory ways of spending their meager supply of coin than by purchasing coal, and, as would is a very inconchopping and packing, they generally light but one little fire per week, which they build in a baked. This, of course, reduces the cooking hazard upon each native house to one day per The Times of June 30, 1819, s week; but they are all immoderate smokers, and their universal custom of carrying a block of matches behind each ear, as a bookkeeper carries ever crossed the Atlantic—was chased a who

Heretofore, there has been no board organiza Honolulu Board of Underwriters" will be a

has been done, while the honesty displayed in its supervision and the economy shown in its execu-tion would afford an excellent model for the guidance of those having in charge similar work at your city, where there is frequently more money expended before the foundation of a public build-ing is finished than would here suffice to comThe principal portion of the business of this city is confined to the four blocks bounded by and including both sides of King, Queen, Fort and Nunnua streets. The inherent fire risk of blocks fronting on Queen street, which are mostly built up with brick and coral, many of the built-ings being of fire-proof construction, but the sec-tion is, unfortunately, exposed on the northeast by the chinese and native quarters (a name which to your San Francisco readers, doubtless,

would delight to rue riot if but half an opportu-mity were afforded him.

The following article from the San Francisco News Letter is of great value as a contribution to
